SUPPORTING YOUNG ENGINEERS

Supporting the next generation: a head start for emerging engineers.

SUPPORTING YOUNG ENGINEERS

RSL GROUP is committed to backing young engineers and supporting them as they begin their careers, recognising that the future of the HVACR industry depends on their talent and ambition. For an apprentice or junior engineer, the high initial cost of professional equipment can be a significant barrier; relying on entry-level tools often leads to technical inaccuracies and the need for frequent replacements.

To bridge this gap, the **NEW RSL GROUP Glasgow Branch** launched an initiative to provide a young engineer with professional-grade equipment. This investment ensures that the next generation of talent is equipped with precision tools designed to last an entire career, marking a clear commitment to both local skill development and industry excellence from the branch's very first day.

CHOOSING THE RIGHT KIT - WHERE TO START?

Working closely with the emerging engineer RSL GROUP curated a foundational kit featuring a combination of Yellow Jacket and Fieldpiece tools - a tool kit built to last.

Where to start? Professional recommendations included:

- **Digital Manifolds** - for precise pressure and temperature readings.
- **Wireless Pipe Clamps** - to streamline diagnostic workflows.
- **Specialised Refrigeration Probes** - for high accuracy system testing.

INVESTING IN THE FUTURE

This project is more than just a sale - its part of a commitment to supporting refrigeration across Glasgow and beyond. By getting the right tools into the hands of the next generation, RSL GROUP are supporting local firms maintain the high industry standards whilst backing young engineers on their journey.

RSL GROUP'S COMMITMENT TO YOUNG ENGINEERS

Start your engineering career with the right gear and professional backing. Whether you are an apprentice or a young engineer, you get:

- **Fast Access:** Why wait? Get your essential tools today, not weeks from now.
- **Expert Advice:** From choosing the right vacuum pump to selecting gauges, our team helps you make the right choice.
- **Technical Backing:** We provide more than just equipment —we offer the expert support you need to work with confidence.
- **Student Discounts:** Show us your student card or apprentice ID, and we'll apply an extra discount to your toolkit.
